EDUCATION

Stony Brook University — **Stony Brook, New York**
Bachelor of Science in Computer Science — *Expected May 2028*

- **Honors/Scholarships/Awards:** Computer Science Honors, Dean's List (2 Semesters), Presidential Scholarship, Valedictorian Scholarship
- **Related Coursework:** Data Structures, System Fundamentals, Theory of Computation, Data Science, Object-Oriented Programming, Logical and Mathematical Foundations

EXPERIENCE

CEAS Undergraduate Student Office — **Stony Brook, New York**
Triage Assistant — *August 2025 – Present*

- Serve as first point of contact for 100+ students weekly, directing inquiries to the right advisors, staff, and campus resources.
- Manage student sign-ins and referrals while coordinating with faculty and staff to support efficient daily office operations.

RoyaltGold — **New York, New York**
Web Dev Intern — *May 2025 – August 2025*

- Built a skincare startup website from scratch as sole developer in HTML, CSS, and JavaScript, prototyping UI flows in Figma to pitch the concept to the CEO.
- Shipped 10+ features, including an AI-powered chatbot, automated email workflows, and a full checkout system, pairing custom code with no-code tools (Lovable, n8n).

VillageCore — **New York, New York**
Intergen Innovators Intern — *March 2025 – April 2025*

- Won 1st place for innovation in a hackathon-style challenge, engineering prompt sequences to build a custom GPT that generated film scripts.
- Explored applied AI concepts — narrow vs. general AI, generative AI, prompt engineering — in hands-on workshops, translating theory into working prompt strategies.

WebGen — **Stony Brook, New York**
Research Assistant — *January 2025 – May 2025*

- Researched 5+ mathematical models and statistical methods to analyze public health records, connecting real-world health data with quantitative modeling techniques.
- Produced technical reports in LaTeX documenting mathematical derivations and data correlations for the team's research.

Girls Who Code — **New York, New York**
Student — *July 2023 – August 2023*

- Built a 3-level JavaScript game in 2 weeks with p5.js, implementing a points-based progression system and scoring logic.
- Collaborated with peers and mentors, including Electronic Arts engineers, using version control and debugging strategies to refine code and improve gameplay.

PROJECTS

Zakat Calculator — **HTML, CSS, JavaScript**
github.com/[nabeehaj]/zakat-calculator — *August 2026*

- Developed a financial tool processing 7 asset/debt categories (cash, gold/silver, investments, business assets, liabilities) to compute zakatable wealth against nisab thresholds.
- Automated the 2.5% zakat calculation with a real-time result breakdown, cutting a 5-step manual process down to 1.

Alien Reflex Game — **HTML, CSS, JavaScript**
github.com/[nabeehaj]/alien-reflex-game — *December 2024*

- Engineered a browser-based reflex game with 9-tile randomized spawn logic across two entity types, adding collision-avoidance checks to prevent overlapping spawns.
- Built real-time score tracking and win/loss state management with event-driven DOM manipulation, handling 2 concurrent interval-based spawn cycles.

LEADERSHIP

Muslim Student Association — **Stony Brook, New York**
Event Coordinator, President — *February 2025 – July 2026*

- Planned and executed 25+ campus events, managing budgets, vendor orders, and venue logistics to ensure smooth operations.
- Led event design and setup, including themes, backdrops, and itineraries, creating engaging experiences for attendees while adhering to college policies.
- Developed tracking sheets and streamlined coordination processes, improving planning efficiency by 75% while resolving last-minute issues with staff and volunteers.

SKILLS

Programming: Java, C, JavaScript, HTML/CSS, Python
Dev Tools: Git/GitHub, VS Code, Eclipse, Replit
Other Tools: Figma, Canva, Microsoft Office (Word, Excel, PowerPoint), LaTeX/Overleaf
